'The president is somehow being exempted from blame . . . despite mounting disaffection . . .

Giscard Rides High, Well Above the Fray

By Jonathan Kandell

PARIS, Aug. 18 (NYT) — Workers at Boussac, a bankrupi textile company that had been refused state aid, blocked the roads around their factory in eastern France this month to protest against the threat of large-scale unemployment.

"If only Giscard knew what was going on," an irate worker at a blockade said. But President Valery Giscard d'Estaing knew very well

what was happening at Boussac.

The company had become a test case for his controversial new eco-

nomic policy aimed at increasing the productivity and competitiveness

of French industry. The policy provides for withdrawing government subsidies to inefficient companies at the risk of rising unemployment. The worker's comment underlined a strange poblical phenomenon in France. The president is somehow being exempted from blame by large segments of the public, despite mounting disaffection with his government's collicies. government's policies.

A poll taken this month showed that 56 percent of French voters were satisfied with Mr. Giscard d'Estaing's performance. The same poll found that 52 percent disapproved of Prime Minister Raymond Barre, a man appointed to office by the president.

'Meeting of Monarchs'

Whether by chance or design, Mr. Giscard d'Estaing has achieved a kind of regal aura above the political fray, without relinquishing any of the power that the Freneb presidential system accords him. An aide who accompanied him on a recent visit to King Juan Carlos in Madrid commented, "It was a meeting of monarchs,"

Mr. Giscard d'Estaing has long been considered aloof. He has been described as a man who enjoys ceremony more than administrative work, and who has lost opportunities to carry out the social and eco-nomic transformation of the country that be promised when be came to power in 1974.

During the campaign preceding the tough parliamentary elections in March, Jacques Chirac, the neo-Gaullist leader, warned that the president's above-the-battle stance risked permitting defeat at the bands of the coalition of Socialists and Communists.

After the unexpected victory, the president was taken to task for failing to move quickly to draw disaffected Socialists into a centrist

coalition that would end the long polarization between the French left

But in recent weeks, Mr. Giscard d'Estaing's monarchical style has won grudging respect from political rivals and critics in the press, who concede that it seems well-suited to the political season.

They note that the one-time Socialist-Communist alliance is now in such deep disarray that any gesture from the president to woo dissatisfied members to a new center-left coalition seems premature. Such an attempt would probably backfire and strengthen left-wing Socialists who argue that their party must continue an alliance with the Communists against the center-right combination of Giscardists and neo-Gaullists, if Socialism is ever to be implanted in France.

The president, meanwhile, has made sbort shrift of eballenges in his own camp, particularly from Mr. Chirac, the mayor of Paris, who makes no attempt to conceal his ambinous to displace Mr. Giscard d'Estaing in the 1981 presidential election.

Mr. Chirac bas publicly opposed the president's foreign policy initiatives — the sending of troops to Zaire and Chad, and strong support for Spain's entry into the Common Market — and has derided the new economic program. But Mr. Chirac's strongest sally came a few weeks ago when he sought to turn the issue of the Paris police budget into a confrontation with Mr. Giscard d'Estaing.

The president did not bother to respond personally to Mr. Chirac's (Continued on Page 2, Col. 4)

Move Seeks to Curb Inflation

U.S. Raises Discount Rate To Boost Slumping Dollar

WASHINGTON, Aug. 18 (AP)

— The government rushed to the rescue of the faltering dollar today by trying to force up interest rates in the United States.

If the plan works, it may help control rising prices and increase the value of the dollar overseas. government officials said.

In the meantime, people in the U.S. may have to live with higher interest rates on auto loans, credit

cards, shopping cards and other sbort-term credit. The Federal Reserve, which controls the nation's money supply, took acoon by raising the discount rate, the interest rate banks must

pay to borrow money from the gov-If the discount rate goes up, it sually means higher interest rates throughout the economy, including

consumer loans. The discount rate was raised from 74 percent to 7% percent, effective Monday. It was only the fifth time in 15 years that the dis-count rate has been used for international purposes.

Disorderly Conditions

"The action was taken in view of recent disorderly conditions in foreign exchange markets as well as the continuing serious domestic inf-lationary problem," the Federal After the announcement, the dol-

lar moved up in value on foreign exchange markets and the stock market rallied. The Carter administration ap-

plauded the action by the Federal Reserve, which is independent of the executive branch.

"The administration fully understands the reasons for this action. It is essential that we control inflation if we are to have a strong dollar and sustainable economic growth." a White House statement said.

Moscow Drops Suit Against U.S. Newsmen

"As we have said, there will be a series of continuing actions over the next several weeks to deal with hese problems," it added.

> The administration bas promised some kind of continuing actions because of a steep decline in the dollar against other eurrencies. In the past 12 months the dollar has lost 33 percent against the Swiss franc, court, it would end up making the 30 percent against the Japanese yen Soviet Union look ridiculous," Mr. and lesser amounts against weaker and lesser amounts against weaker currencies. Action Delayed on Taxes For Americans Overseas

By Robert C. Siner

WASHINGTON, Aug. 18 (1HT)

House Rules Committee action on a comprehensive revision of the conferees and for passage of the taxation of Americans overseas will compromise measure by both bousnot take place until Sept 6 at the es. Adding to the difficulty are unre-

According to committee aides, the press of other business has made it impossible for the panel to take up the measure, which was passed by the Ways and Means Committee earlier this month, until after the House returns Sept. 6 from its Labor Day recess. The House recessed yesterday, but the Senate is still in session.

After the recess, the Rules Com-mittee will report the bill out for action and determine the type of amendments and debate allowed on the floor. Supporters of the mea-sure had hoped to bave at least Rules Committee action completed before the recess.

The measure is expected be at-tacked by some House liberals on the floor, but quick passage is considered almost certain.

The Time Factor

However, the latest delay underlined the importance that time has played and will continue to play in efforts to revise the taxation of Americans abroad.

Once passed by the House, the bill must go to conference with the Senate, which has passed its own measure. It differs significantly from the Ways and Means Com-

Congress hopes to adjourn by the second week of October to give members time to campaign for the November elections. This would leave only about a month for the

however, the price of such gas will be allowed to increase and is expected to double in cost.
Vice President Mondale said that

chances are excellent for passage of an energy program before year's end. But Sen, Jackson predicted a "razor thin" vote in the House and Senate on lifting federal price controls from natural gas.

"This is a major step forward un-der the most difficult of circumstances . . . and I and the country owe a debt of gratitude" to the con-ferees, said Mr. Carter today after he belped reach the agreement in a meeting with key legislators last

night.

He told reporters that natural gas is "one of the most difficult aspects of the energy package" and that the agreement is "in the best

interests of the country." **Dollar Argument**

Sen. Jackson said Mr. Carter's argument on behalf of the declining dollar belped spur the compromise. "We have a hard fight ahead." the chairman of the Senate's energy conferees said at a news confer

Calls for 'Enhanced Vigilance'

Vietnam Reports Threat To Internal Social Order

BANGKOK, Aug. 18 (UPI) — In an unusual report on internal security problems, Vietnam today said that social order was being threatened by esistance forces, sabotage, espionage and enemy propaganda.

It appealed to the Communist Party, the people and the armed forces to enhance vigilance against the internal threat.

Radio Hanoi, in a Vietnamese-language program monitored here, said

that its armed forces in the southern provinces were fighting "remnant enemy troops, reconnaissance men and counterrevolutionaire The broadcast claimed that government security units had fought bravely and successfully.

"They have dislodged reactionaries from many of their positions, forcing them to surrender to the revolutionary administration." it said.

Problems in Saigon

Problems in Ho Chi Minh City (formerly Saigon) were reported, but the radio said that the city's armed security forces "promptly uncovered and effectively frustrated all plots of the hourgeoisie and counterrevolutionaries to resume their activities. In provinces along the northern border with China, security forces were

Vatican Holds Rehearsal With Papal-Ballot Stove

By Paul Holmann

ROME, Aug. 18 (NYT) — The Vatican today held a rehearsal of procedures during the conclave for the election of a new pope that is to start in a week, testing an old cast-iron stove by which the outcome of the balloting hy the cardinals will

Priests, nuns, curious passersby, and many reporters and camera-men were in St. Peter's Square this

morning to watch the experiment.

They saw smoke rise from a metal stovepipe that pierces the roof of the 500-year-old Sistine Chapel. The thin feather of smoke at first seemed to be an uncertain gray, and eventualy turned white.

If the conclave of cardinals had actually been under way, the white smoke would have meant that the Roman Catholie Church had a new

Inconclusive votes, according to tradition, will be signaled with dark smoke, fin years long past the color-ing was produced by burning damp straw and rags along with the cardi-nals' ballots. Now, chemicals are added to the ballots to produce the dark smoke that tells the world that no candidate for the papacy has

Alleged KGB Agent Gets Swiss Permit

GENEVA, Aug. 18 (UPI) — Switzerland said today that it has agreed to give a residence permit to Gele Dneprovsky, a Soviet employ-ee of the United Nations who is alleged by the United States and Britain to be a KGB agent.

Mr. Dneprovsky, with the UN personnel division in New York for the last 10 years, was appointed personnel director at UN European headquarters in Geneva in May.

ohtained the required two-thirds majority.
The ballots in the final, success ful vote for a new pontiff will be burned without any additional sub-

stance, producing white smoke.

About an hour after that hap-About an nour arter that hap-pens, the new spiritual leader of 700 million Roman Catholics will show himself on the central balco-ny of St. Peter's Basilica, wearing white ponitifical vestments, and will impart his first apostolie hless-

The senior cardinal, who will in-

The senior cardinal, who will introduce the newly elected pope, will also announce the pontifical name that the new pope has chosen to assume. Churchmen are speculating these days how the frontrumers in the papal election would style themselves if successful.

The 185-year-old ecclesiastical outfitting firm Annibale Gammarelli, in the center of old Rome, displayed today the three sets of new pontifical robes that are traditionally prepared before the selection of a new pope — one for a short, chubby man, one for a tall, thin one, and one for a tall, robust one.

one.

The cardinals, meeting this morning for their daily pre-conclave gathering, decided to pray jointly in St. Peter's Basilica next Friday for inspiration from the Holy Ghost before they go into seclusion. In Roman Catholic doctrine, the Holy Ghost or Holy Spirit, third person of the Trinity, guides third person of the Trinity, guides the sacred college of cardinals in choosing a new head of the church.

The invocation of the Holy Gbost will take place during a concelebrated mass. The cardinals also decided to begin entering the con-clave — a walled-up area around the Sistine Chapel — at 4:30 p.m. Friday insted of at 5 p.m. as originally planned. Logistics was given as the reason.

News Analysis

Arabs Talk Down Camp David

By James M. Markham

AMMAN, Jordan (NYT) - Next month's planned summit between President Carter, Prime Minister Menachem Begin of Israel and President Anwar Sadat of Egypt has aroused deep skepticism among Arabs left at the sidelines of the Middle East peace quest.
A tour of Lebanon, Syria and

Jordan uncovered a widespread conviction among well-placed Ar-abs and Western diplomats that the peace initiative launched by Mr. Sadat's visit to Jerusalem in November had run its course - and that the United States was unwilling or unable to apply what is perceived as necessary pressure on the Begin government to achieve a

In Beirut, Damascus and abs believe the United States hopes Amman, officials and diplomats to improve to make it "acceptable," had so far been unable to secure Israel's consent to move a token contingent of 650 Lebanese Army soldiers into the troubled southern Lebanon border region, held by miliuamen sustained by Israel.

"If Carter can't even get the little Lebanese Army into the south, how can he get Begin off the West Bank?" a United Nations official asked rhetorically. "I think Begin knows the American government well enough to know that it will push only if it is pushed."

Separate Peace

In both Syria and Jordan, there is some official concern that the United States bas decided to move toward what would amount to a thinly disguised separate peace be-tween Egypt and Israel, which would leave President Hafez al-Assad and King Hussein in exposed

by the belief that the Begin govern-into negotiations until he is sure he ment will probably not budge will not be kicked in the teeth by enough on the central issue of the his Arab brothers." Israeli-occupied West Bank to make a camouflaged separate peace

reperties the comparison of the relatively simple issue of Sinai would consume Mr. Carter's time and energy.

"We are talking about three people who are standing in the air and saying they are levitating," said a sarcastic Palestinian official in the said of terratorial arrangement on the West Bank without the said of terratorial arrangement of the said of the sai David could be anything but a failure," said a European ambassa-dor. "The fundamental thing is: Can any Arab commit himself to some kind of territorial arrange-ment on the West Bank without some kind of Israeli commitment to ultimate withdrawal? Even if you could somehow give some hope of withdrawal, it must not be a devel-opment of the Begin plan, which is such a dirty word around here."

The Begin plan, which many Arpointed out that the United States calls for limited home rule for the hiv I.I milion Palestinians on the West Bank and the Gaza Strip. with the Israelis having a veto over such key issues as immigration to

Unresolved Sovereignty

The plan would allow Israelis to purchase land on the West Bank, and it leaves open the question of sovereignty in an area that Mr. Begin regards as historically belonging to the land of Israel.

To consolidate an eventual deal on the West Bank, the United States evidently hopes to involve Jordan's King Hussein, who bas taken an uneasy middle position on the Sadat initiative, praising the Egyptian leader's "courage" but expressing reservations about his

Arab commentators say that simply moving Mr. Sadat and Mr. Begin closer together on the relatively

people who are putting safety nets under Uncle Anwar. We are talking about people who are standing in the air — so first somebody has to admit that they are about to fall."

Saudi Arabia's tacit endorsement of the tripartite Sept. 5 summit is seen by many as expressing a willingness to have the burden of failure shift from Mr. Sadat, whose regime is heavily subsidized by the Saudis, to Mr. Carter and Mr.

A failure at Camp David would permit Mr. Sadat to save face in the Arab world, throwing the blame onto the Israelis, and give the Saudis the leeway to resume their discreet moves for an Arab summit that would consecrate Mr. Sadat's return, with honor and without bumiliation, to the Arab fold.

Giscard Rides High, Well Rated Above the Fray Despite Protests

(Continued from Page 1)

attacks, and the police issue particularly illustrated the effectiveness of his aloof political style.

Ever since Mr. Chirac was elected in 1976 over Mr. Giscard d'Estaing's hand-picked candidate, a confrontation between the two leaders has been predicted. When the police budget came up last month, Mayor Chirac insisted that the national government increase its share of the \$240 million outlay, and asserted that municipal taxes would have to be raised if aid was not forthcoming.

The president refused to join the battle and instead let Prime Minister Barre respond by pointing out that the city's coffers had a large enough surplus to finance its usual share of the police budget. The embarrassed mayor conceded that the money was there, and the incident has come across in the press more as a failed power play by Mr. Chirac than as high-handedness by Mr. Giscard d'Estaing.

The prime minister has also served as the president's stalking horse for economic policy. While Mr. Giscard d'Estaing has kept silent, Mr. Barre has spiritedly defended attempts to free the prices of industrial reads. goods, remove government subsidies to ailing companies and hold down wage increases. And it is Mr. Barre who has emerged as the villain in the eyes of striking textile, shippard and metallurgical workers who face the loss

of jobs at their failing companies. It will probably take two or three years to determine whether the economic program will succeed in modernizing French industry. But it is the sort of gamble that Mr. Giscard d'Estaing alone could take

among West European leaders. While in Britain, Italy and West Germany, leaders are strapped by narrow margins over their political opponents and face the prospect of risky elections, the French president does not go to the polls until 1981 and counts on a 100-seat margin in Parliament.

Apparently confident that be will be re-elected to another seven-year term, Mr. Giscard d'Estaing, again scenning to rise above the dreary concerns of everyday politics, has started to speak about preparing

Sale of Textiles Firm Approved in Paris

By Jane Friedman

PARIS, Aug. 18 (IHT) - A Paris court today approved the sale of the Boussac textile group to the Agache Willot holding company of Lille, in northern France.

The Boussac group, with an annual revenue of \$200 million, was founded at the beginning of the century by Marcel Boussac, 89, and has been close to bankruptcy since the spring. Forty-seven of the Boussac companies, subsidiaries of his Comptoir de l'Industrie Textile de France, were placed in receivership by the Paris Tribunal de Commerce during the spring and the summer.

Today's decision ends a take-over battle for the group between Agache Willot and industrialist Maurice Bidermann. Agaebe Willot, with annual revenues of \$1.4

Ex-Legislator To Get Parole in U.S. Bribe Case

for final approval. Sen. McClure and Sen. Domenic emerged from the White House and told reporters that they had signe and had learned Sen. Mark Hat field, R-Ore., and Sen. Dale Bump

ers, D-Ark., had also signed. With five previous assured votes that made nine names on the Sen ate side, a bare majority of the Senate conferees.

GIs in West Germany Face an Exercise in Poverty

By Wellington Long
KAISERSLAUTERN. West
Germany. Aug. 18 (UPI) — As
the purchasing power of the U.S.
dollar was dropping, a worried
West German landlady noted to
her American Gi tennant and his wife: "You're not putting much

trasb out this week.

Trying to belp, she baked a cake for the couple and let them have a bucket of cherries from the tree in her garden. But the couple needs more than an occasional cake and

bucket of cherries.

• A load of washing at the local laundromat costs more than a dollar — about three times what it would cost in the United

States.

The couple's monthly household electricity bill is \$45, their monthly gas bill is \$30 and regular gasoline, if they can afford an old car, costs 66 cents a Some soldiers say that they are able to serve in what President

Carter proudly called "the point of the Western sword" only because their parents send an occasional check. Others pile up debts until they end their foreign The number of U.S. soldiers in Europe taking Army Emergency Relief loans during the first six

Thousands Would Qualify for Food Stamps in U.S. months of this year was 13.9-percent greater than during the corresponding period last year. The amount of such loans and grants rose by 30.7 percent to \$647,151, the Department of the Army reported. And nobody knows how many GIs have U.S. charge-account debts that are being left

With 50,000 U.S. soldiers and dependents, the Kaiserslautern military community, encompassing air and army bases, is the largest community of Americans outside the United States, Many of its lowest-ranking residents are living below the poverty level. Furthermore, an increasing number of soldiers in the all-vol-

unteer Army are married and

have at least one child here with But the married recruit who is sent abroad to join the force of about 190,000 in Europe starts at a disadvantage. Because he has served for less than two years. the Army will not pay transpor-tation costs for his wife and children. So he usually begins his post-basic-training military career by borrowing money to transport his family to West Ger-

The Army bas official quarters for about half of the military families here, so the newcomer usually must rent an apartment from a civilian landlord - "on the economy," as the GIs say.

Those rents are high and, with the exchange value of the dollar in West Germany having dropped about 15 percent in the last year, get higher all of the

Spec. 4 Michael Semonin and his wife, Janet, pay 590 marks a month for rent and utilities for a small apartment in Bad Kreuznach. A year ago they could buy the 590 marks for about \$287. Today, they must pay \$300. Since Mr. Carter came to West

Germany in July for the Bonn economic summit of Western leaders, the value of the dollar in terms of marks fell by four per-"It is scary, considering what might happen," a corporal sitting with worried friends in Kaiser-

Ray Says He Would Repeat Confession

Ray told the court that "no one used pressure" to convince him to But Ray said that that was not the case, regardless of what he told the court. He claimed that his attorney, Percy Foreman, pressured him on the plea, that he had suf-

fered mistreatment in jail, that he could not sleep, and that his health had degenerated. Rep. Sawyer asked why Ray had not raised those issues before his sentencing. "Did you make any complaint at all about Mr.

Foreman?" Rep. Sawyer pressed. Ray: "I can't see how I'd do anything any differently, hased on the position the prosecutor and Percy Foreman had me in. There's really no big deal about maneuvering a defendant into a guilty plea. All guilty pleas are not made in heaven."

U.S. Study Finds Smoking, Pill A Potentially Fatal Combination

NEW YORK, Aug. 18 (NYT) — Women who both smoke and take hirth control pills are about 22 times more likely to sustain a commonly fatal type of hrain hemorrhage than women who do neither, a medical study has found.

The scientists recommend, in a recent issue of the British medical journal. Lancet, that oral contraceptives should not be used by women who smoke.

Although smoking and the pill have long been independently linked to an increased risk of death from cardiovascular the new study confirms the belief that the two together pose a risk far greater than either alone. The study indicates that the two factors act synergistically, multi-

plying one another's effects. Women who smoked cigarettes hut did not take the pill sustained brain hemorrhages 5.7 times more frequently than women who neither smoked nor took the pill. Women under reversed circumstances, who did not smoke hut did use the pill, had a hemorrhage rate 6.5 times greater.

If the effects of either factor acted independently, the combined risk would be expected to be the sum of the two risks, or 12.2. In fact, it was nearly double, or 21.9.

This synergistic, or multiplier, effect is similar to what is already known about the risk of heart attack among women who smoke and use oral contraceptives. The new study involved a type of hleeding within the brain

known as subarachnoid hemorrhage. The cause of such bleeding is not known but is helieved to involve weaknesses in the walls of blood vessels that permit them to rupture under certain circumstances. It is not known whether tohacco and contraceptive drugs cause the weakness or act upon a congenitally caused weakness.

The report was made by Dr. Diana Petitti and John Wingerd of the Kaiser-Permanente Medical Center in Walnut Creek, Calif., as

part of a large, continuing evaluation of the effects of birth control pills. Their study began in 1969 and involved nearly 18,000 Califor-

However, Deputy District Attorney Tom Orloff said that Newton's trial would proceed, with jury selection beginning Monday in Alameda County Superior Court.

Diplomatic immunity was invoked years ago to protect representatives of a government from in-timidation in the country in which they were stationed. It was designed to protect diplamats from harassment under local laws, or from false charges.

As embassy staffs grew over the years, more and more of their employees no longer performed funcnons directly related to dealings with the U.S. government. Yet thousands of people, from amhas-sadors and their top aides to household servants and their families, retained full diplomatic immunity.

The bills passed by the Senate and House both strip at least some diplomatic immunity from more than half the embassy personnel tims of diplomats' negligence. and dependents in this country by A spokesman for Sen. Paul Sar-

Ex-Employee Of CIA Charged With Espionage

WASHINGTON, Aug. 18 (UPI) — A former C1A employee was ar-rested in Chicago yesterday on charges that he delivered a stolen national defense document to a So-viet agent in Athens, the FBI

FBI Director William Webster said that William Kampiles, 23, was arrested on espionage charges.

According to the FBI. Mr. Kampiles was employed as a watch offi-cer for the CIA from March to November of last year. He was alleged to have removed a top-secret docu-ment, entitled "KH11, System Technical Manual," from CIA headquarters while employed there and to have kept it in his possession when he moved from Vienna, Va., to Chicago.

According to a complaint filed with a U.S. magistrate in Chicago. Mr. Kampiles delivered the document to a Russian by the name of "Michael" on or ahout March 2 of this year in Athens and was paid

Croatian Rebels End Takeover in Chicago, Free 6

CHICAGO, Aug. 18 (UPI) — Two Croatian terrorists who hurst into the West German Consulate here yesterday with guns and ex-plosives and took eight persons hostage surrendered 10 hours later and released their six remaining hostages unharmed.

The terrorists has freed one hostage yesterday, and another hostage had escaped. The surrender appeared to have

been negotiated by Chicago Mayor Michael Bilandic, himself a Croatian, who flew to the scene from the state fair in Springfield. The terrorists were turned over to FBI agents. They had demanded

the release of countryman Stjepan Bilandzic, reportedly the head of the Croation Peoples Resistance Movement, who is being held in a West German prison for the attempted murder of a Yugoslav offi Police said that the terrorists had

several pistols and about 17 sticks of dynamite that could have been exploded simply hy touching two wires together.

person's diplomatic immunity would then depend on his or her

Ambassadors' Families

Amhassadors and their dependents would retain full immunity from legal actions, civil or criminal. Aides, administrative and technipersonnel would retain full criminal immunity. But they would be immune from civil suit only when they were acting in official capacities.

Families of administrative and technical personnel also would retain full immunity from criminal suit, hut would have no immunity from civil suit.

Chauffeurs, janitors and other service personnel would be protected from criminal and civil suit only the suit arose from actions taken at the direction of their embassy.

Janitors' Families

Families of chauffeurs, janitors and service personnel would be considered ordinary citizens, and would be tiable for any civil suit or

criminal prosecution.

The bill would require the president to promulgate rules requiring all those connected with diplomatic missions to carry liability insurance for auto accidents.

Put your trust in a diamond.

A Victory for Foreign Aid

The House vote on the foreign-aid money was a triumph not only for good sense, but for good management as well.

In the late spring it looked very much as though the bill, and the whole principle of foreign aid, might be defeated outright - or subjected to an array of crippling amendments that would amount to very much the same thing. Three times, the House leadership, fearing adverse votes, pulled the bill back. The tactical situation was particularly difficult because the attack oo the bill was being led by Reps. Clarence Long, D-Md., and C.W. Young, R-Fla., the chairman and ranking Republican of the Appropriations subcommittee that wrote it.

The rescue of the bill was a remarkable example of skillful lobbying in the national interest. Rep. David Obey, D-Wis., and other members of the subcommittee took over the tactical command of the campaign, with powerful and well-focused support from the White House, and the State and Treasury departments.

The vulnerability of foreign aid is always obvious at first glance. The full reach of its benefits is apparent only with longer consideration. Over the years, successive presideots had paid little attention to foreign aid, and the bills suffered increasingly from inatten-

That decline reached a low point in June. when the Carter administration and the congressional supporters of foreign aid suddenly realized they had to make a fundamental case for it.

Congressmen with doubts about the appropriation began getting phone calls from unions and businesses at home, reminding them that most of the aid money is spent in the United States, on U.S. products. Some congressmen had been inclined to cut out aid to countries with poor records on human

rights; there were long conversations with diplomats emphasizing the total loss of U.S. influence and leverage that would follow any vote to end aid. Some congressmen were thinking about using aid restrictions to protect certain U.S. products from greater foreign competition; the waverers got the opportunity to reflect on the infinite possibilities of foreign retaliation. Sometimes the House votes in haste, and carelessly. But the bill's managers ensured that members would have time to think about the consequences of their decisions.

The outcome was a clear decisioo to carry on the 30-year U.S. tradition of foreign aid. But it was not a complete victory. While most of the wrecking amendments were defeated, the House passed two that will make serious trouble if the Senate does not delete them. They involve aid - the key term is "iodirect" aid — to Cuba and Vietnam. This bill includes the U.S. contribution to the World Bank and other international lending agencies. All the contributions go into one pool of mooey from which all the loans are made. That prohibition on indirect aid to those countries would prevent the World Bank from giving them any aid at all.

The other countries contributing to the World Bank see these restrictions, correctly, as a U.S. attempt to turn a cooperative interoatiooal lending agency to its own political purposes. That's why the World Bank will oot accept money with this kind of string attached. But the U.S. contribution is the foundation on which is built a great structure of other oations' money, plus investments by commercial banks and private lenders.

The poor oations' access to capital depends crucially on the World Bank. It would be wanton to jeopardize that structure to score a point - more accurately, half a point - in this country's quarrel with two small and undeveloped countries.

THE WASHINGTON POST.

Toughness Doesn't Tell

The directive has been coming out of various quarters of the Carter administration for a couple of weeks now. The president himself, the vice president, John White, who is the Democratic Party chairman, and most recently Agriculture Secretary Bob Bergland have given vent to it in ooe form or another. It is a message to the party fractious, the hypercritical and the superindependent, and it may be summed up as follows: Knock it off. Meaning, knock off the cheap shots, the gratuitous insults, the unfriendly analyses . . . and, if you are a legislator, stop thinking you can oppose and thwart and generally twit the presideot of the United States without the president's fighting back.

So far, so good. For if there is one thing that has grown slowly and painfully evident in Jimmy Carter's Washington over the past year and a half it is that Mr. Carter and his program were suffering mightily from an absence of anxiety or awe oo the part of his fellow Democrats on Capitol Hill and elsewhere (including io his administration). Few seemed to feel that it was even mildly imprudent, let alone dangerous in any respect, to rake the presideot over the coals in public or tell him to go fly a kite as the spirit might move. You announced that the president and all his works were no damned good - and then turned up at the White House to demand your two-week all-expenses-paid trip to Hawaii and a free set of dishes.

Well, that obviously is now meant to be coming to an end, and not a minute too soon, in our humble judgment. But the satisfaction we take in this turn of events is tempered by the absolutely clonky way in which it is being

undertakeo. Consider Mr. Bergland himself, explaining to some reporters the other day how the new

dispensation is expected to work. After the fall elections, Mr. Bergland said, the president intends to make hostile or carping legislators pay a price in patronage. He waxed vivid on the ways in which he and his colleagues might set about punishing the errant legislators.

Now, as an act of political combat this is more or less the equivalent of shooting yourself in the foot.

For the problem with the Bergland Doctrine is fundamental and incurable. It is that a Bergland Doctrine should oever be enunciated in the first place. To formulate it out loud is to vitiate any force it might have. It looks like bluff . . . and huff and puff. It transforms an overdue and crucial aspect of administration policy toward the Hill into another solo by the Big Bad Wolf. Talked about, boasted about - especially, God help us, in advance - it simply will not be taken

That Mr. Carter needs to stop being Mr. Nice Guy in relation to the barons of Capitol Hill is beyond dispute. He needs desperately to begin using the patronage at his disposal in a sophisticated, productive way - to make opposition cost something, and support be worth a legislator's while. But it does oot need to be done crudely. And by itself, in any case, it will not provide an answer.

The president oeeds to assert his authority and will to succeed in a way that is plausible and therefore consequential on the Hill. When the politicians in his party are in the proper degree of awe of him you will know it.

Unfortunately, threats about crackdowns and the rest will probably only delay the time, if ever, that any of this comes about. THE WASHINGTON POST.

International Opinion

Chairman Hua's Journey

For a Chinese leader to lauoch a thinly veiled attack on Russia, in the capital of one of Russia's allies, is an event. True, Romania under Ceausescu has been pretty independent in foreign policy. But the Romanians have never gone too far . .

What this does show is a new confidence in China, and a willingness to get China into the diplomatic act in places which are a long way from Peking . .

The world is going through a dangerous phase in which weakness and indecisioo in Washington is matched with growing power

and ambition in the Soviet Union. The key to peace, which is the right aim of foreign policy, is the maintenance of a convincing balance of power.

It will take time for the West to pull itself together. In the meantime, it is our great good fortune that China feels as threatened by Russian power at least as much as we do

China is a Communist country which does not love us for our liberal and democratic ideals. It is pure power politics. Even so we should give every encouragement to our allies

Getting Off the Ground

Takes More Than Hot Air

By Henry Allen

WASHINGTON - The domi-V nant flavor in tobacco poli-tics is what amounts to a tacit oooaggressioo deal between Washington and the cigarette industry.

Grasp that and you're on the way to understanding why a sensible suggestion from a politically naive government scientist sent Washing-ton's high command of health into a fit of petulant pronouncements

The scientist is Gio Gori, an administrator at the National Cancer Institute, who for the past five years has supervised a program in which \$18 million was spent for the development of "less hazardous" cigarettes. In a paper sooo to be published in the Journal of the American Medical Association, Gori and a colleague correctly state that in terms of what are now known to be the most dangerous components of cigarettes, some present-day hrands — while not safe — are safer than most of those sold in 1960. They urged, While programs to discourage smoking should continue, these educational efforts should be coupled with others directed toward reducing the risks to persistent smokers, of whom there are many among this nation's 50 million cigarette

Less-Noxious Smoke

Less-noxious smoke, they cootinued, could lead to a reduction in cigarette-induced illness and death. And then, lapsing into a hit of easily misunderstood technical jargon,

they speculated that the reduction might be so great that the toll from cigarettes might be "considered so-cially tolerable" — meaning that it wouldn't stand out, as it now does, in mortality statistics. In lay terms, their message was: Don't smoke, but if you do, opt for the less poisonous varieties, which they listed in their article. The answer is that Gori's governmental denouncers, fervent anti-smokers all, bave the mistortune of being in command of a mock war in their article. against tobacco. Though none of them raised any valid criticism of the scientific substance of the arti-Press reports of the Gori thesis brought prompt denunciation from the director of the Cancer Institute, cle, they recognize that a govern-ment-linked nod to the relative adfrom several other top-level government health officials and from the Department of Health, Education and Welfare, whose chief, Joseph vantage of "less hazardous" smoking could diminish even the slightest support they now com-mand for anti-tobacco efforts. For Califano, is leading a loudly proif smoking can be depicted as safe, claimed but, as it turns out, very thrifty campaign against smoking. Gori, they charged, is luring the public into thinking smoking is or even safer, why should the government provide any support to en-courage cessatioo?

The present and-smoking effort. slight as it is, is politically precari-ous, what with our beleaguered president having recently journeyed to the beart of tobacco land to land the economic value of the weed, which, produced mostly on smallscale boldings, carned some \$2.3 billion last year for 600,000 farm families. To sell that stuff, the cigarette industry spends more than 5300 million a year to advertise the top 20 brands; against that sum, HEW has upped its anti-smoking educational drive to \$6 million, an amount so piddling as to wipe out any claim that the government is determined to help its people kick

they exist, though it must be emphasized that they are only safer, not safe, and their main benefit may be only that they delay the ar-rival of cigarette-induced ailments. But given the fact that millions smoke, and that the biggest market growth is among teen-agers, it's preposterous to reject what may be an opportunity for some hazard

The Perils of Travel By Thomas W. Lippman TRIPOLI — The Libyan capi-tal's new international airport

Letter From Libya:

is open at long last, a glearning up-to-date facility that should relieve some of the suffering of travelers who had been forced to use one of the dirtiest and most crowded air-ports in the Arah world.

On a recent flight from Rome passengers broke into applause and shouted "praise to Allah" and "bellissima" when they saw that their plane was taxing up to the new terminal instead of the old

one. Inside, they found that the Li-hyans have done foreigners the fa-vor of allowing arrivals and departures to be posted in English as well as Arabic, a rare exception to the Arabic-only rule that prevails throughout the country. Announce-ments on the public address sys-tem, and immigration and customs forms, however, are still exclusively in Arabic.

The bright new surroundings have not softened the stooy looks of the immovable Libyan customs agents who accost arriving passengers, on the lookout not only for liquor but for unauthorized books and periodicals.

Most magazines and newspapers are simply confiscated, regardless of language or content — The Guardian, the Ioternational Herald Iribune, Corriere della Sera, the Alitalia Inflight magazine. This is partly because of censorship rules and partly because the government oow has a monopoly on the import of these materials.

Books are treated differently. All are taken away, hot those that are deemed innocuous can be re-claimed a few days later. Books in Japanese, which hardly anyone in Libya can read, meet the same fate as books in Italian or English.

The books that are not returned, those that are politically or religiously suspect, simply disappear. It is not that all Libyans are prohihited from reading them — the li-brary in the foreign ministry, for example, contains a useful collection of books that would never be allowed in at the airport, including the memoirs of those two arch-villains, Menachem Begin and Anwar Sadat. It's just that the government censorship apparatus controls the distribution, which is limited.

THE AIRPORT is only the first indication of the construction boom that is transforming the face of Tripoli. Even two years ago, the town retained some of the charm of its Mediterranean-style arcaded buildings, but now it is a traffic-choked hodgepodge of schools, factories, hospitals, sewers, freeways and high-rise apartment buildings. It is wholly out of character for

Libyans to live in high-rise apartments, but the flow of rural folk

into the oil-rich city has made it

oecessary. Unlike Saudi Arabia, Libya spending little oo fancy offices for government ministries and banks Priority here goes to productive construction — harbors, factories, communications — and to public service facilities such as schools

and housing.

That may be the reason the construction boom has not included a single first-class hotel, of which Tripoli has none though one is planned. Lihya has no oced of luxury hotels to attract husinessmenting. since they come anyway in search

of lucrative contracts, and the country has no interest in tourism.

With 1,100 miles of unspoiled Mediterranean coastline, magnificent Roman ruins, good weather and proximity to Europe, Libya could be a major tourist center if is wanted to, but it doesn't. The Libyan leader, Col. Moame

Qadhafi, and his team consider tourism both demeaning and dangerous, since tourists bring with them liquor, gambling, sexual temptotion and unpalatable political nonons.

THOUGH there are hardly any tourists, there are plenty of visitors, as Libya welcomes a seeningly endless parade of official delegations — students, workers delegations — students, workers, women's groups, liberation organ, izations, religious groups — who come here as guests of the government to hear Qadbai's message of fslam and anti-colooialism.

No sooner bad a conference of Arab women left recently than their places were taken by several dozen young meo from Uganda who are bere for three months at Libya's expense, to inspect Libyan industrial projects. They said they found clothing and consumer goods cheap here, more a reflection of shortages and high prices in their own country than of any bargains to be found in Libya.

One country that is curiously absent from those that send students and workers and women here China - or at least the People's Republic of China.

This, according to U.S. sources, is largely because Libya, one of the most radical of the Arab states, still maintains full diplomatic relations with the Nationalist Chinese government oo Taiwan. Here in Tripo-li, as in Washington and Jidda, the flag flying over the Chinese embassy recently was the red, white and blue gearwheel of the Naulooalists. This, however, is expected to change as a result of the recent visit to Peking by Qadhafi's right hand man, Maj. Abdel Salam Jalloud.

The Libyan flag is now a moon chromatic solid green. It used to be nearly identical to the red, white and black of neighboring Egypt but was changed when Sadat wen to Jerusalem last year.

problem that will arise next year when the U.S. rule of global taxa

tion is juxtaposed with the French

repeal of its law that taxed Ameri-

more fuel than the average European but also that the security of Europe depends on our continued energy orgies. He cites, as an exam-ple, American dependence on the automobile, implying that we are entitled to go on driving our power-ful gas-guzzlers until we can effect the "expensive and disruptive transfer to efficient public trans-

portation. Has Mr. Van Dyke seen, any-where in the United States, a significant effort to hulld such a transportation system? And, in talking about the mild (?) climates of Paris and London, isn't he choosing to ignore that the Parisian or Londoner suffers far more from the cold albeit uncomplainingly - than the over-heated Bostonian or New Yorker?

No, we will have to learn to tive less comfortably. The security of Europe which Van Dyke would have us preserve is better served by energy efficiency and self-sacrifice than by continued gluttony.

For starters — let's knit a few

wool sweaters, han the super-borsepower engines and shoot out half the light bulbs in our homes and public buildings. EDWARD SAINATI. Barcelooa

Norway Pears

Clearly, Waverly Root's research for his article on "The Fussiness of the Fragile Pear" (1HT, Aug. 8) was incomplete; although f live in Nor-way, f have a lovely pear tree, which produces fine-quality fruit each year. Perhaps the tree doesn't know about Norway being too far north for pears?

Tass Comment

Your recent article (IHT, Aug. 11) that Tass political Yuri Korni-lov found U.S. defense trends "dangerous" cannot go without a retort. Many Americans have been fighting militarists in the United States for decades. We have received no help from counter movements in the Soviet Union. Such movements are squashed by their dictorial bureaucracy. I suggest Mr. Kornilov turn his atten-tion to the militarism of his own nation. After all, the United States got out of Vietnam, doesn't want to get into Africa, and would like to disengage in Korea and Europe. What has Russia done receotly? Eleven Russian generals in Africa

More results and less propaganda, Mr. Kornilov, pass it on to your boss. For starters, how about pulling out the half-million troops you hold down East Germany with, and turn the 4-to-1 tank advantage [that the Russians] hold over NATO into a 1-to-1 rano? Really, enough of

a 1-to-1 rano: Realy, your World War II paranoia. E.M. EVLETH. Paris.

Double Taxation Jane Friedman's article (IHT,

Aug.9) had me calling for ratificatioo of the present, initialed protocol to the Franco-American Tax Treaty. Would that it were so simple. The protocol falls far short of dealing with the double-taxation

cans only on their French-source tion treaty should have been re viewed and revised. The protoco was a failure, and all iodicador are that this problem still has lo U.S. Treasury priority. As I advise many U.S. individu als who are not employed by U.S. multinationals, but are either sel employed here or employees of lo

cal companies, I am in a posicion comment oo the plight of this for gotten segment of "expatriates." They receive no tax reimbursement or foreign allowances and are the in even greater need of a continue section 911 exclusion. Their pre ence abroad enhances the Amer can image as well as its pocket book, albeit less manifestly. The may be the remnants of the Amer can pioneer and as such should it protected as least as much as an endangered species. The present bill before the House Ways an Means Committee would for many of them to return to the U.S. thereby depriving them of a bas freedom which the pioneer symbo

Sculptors Flock to Alps To Give Lively Exhibit

By Edith Schloss

DIETRASANTA, Italy (IHT) -The Apuane Alps, full of the world's most prized veins of marble, stretch from Viareggio to Luni. the old Roman port at the mouth of the Magra River. Carrara, halfway between the two, is the best known center for the working and cutting of the blocks from the quarries above, Massa is the largest and most np-to-date and Pietrasanta, where Michelangelo and other sculptors before him worked, is one of the oldest. To this day sculptors from all over the world flock to the region, not just to use the material but to be with their fellows in the unusually congenial and bracing at-

mosphere of the workshops. Unuil a few years ago, the Inter-national Sculpture Biennale in Carrara provided a meeting point and a useful survey of what was going on in the field, but local political squabbling eventually ended it. Then in 1975, cooperation among foreign and resident sculptors, mar-ble craftsmen and workers and local authorities brought about this annual exhibition, "Sculptors and Artisans in a Historical Center." It has not always been satisfying. Pieces of marble, understandably, have predominated to the disadvantage of more modern materials for sculpture. Selection has been based more on local rules and party affiliations than on achievement, and often the big hunks of marble were monumental but lifeless.

This year's show, the fourth in Pietrasanta, is the most lively and

partial to the medium. Not only is there marble, but other stone and metal, particularly bronze, and found objects, welded or pieced together. Above all, it is an exposition of all the means and styles practiced in sculpture today.

Pleasant Viewing

The exposition, never didactic, and assembled in the ancient main square as in the past and in lots and alleys and indoors, provides pleasant viewing and ambling in the old center.

Sculptures in these parts, even if abstract, have had a conventional connotation, for they were to serve as monuments. New examples of pop art, less ponderous and earnest, push the traditional medium as far out as it will go, and some assemblage units attempt to do the same. Among those roughly in the pop art field are the amusing Baru-chello, with a pair of shoes and a steak in bronze; Oste, who is so jealous of painting that he freezes a paint stroke and and a brush in aluminum; the Canadian Esther La Pointe, who fashions giant nonthreatening kitchen knives, and De Sanetis, who gets away with a valise in alabaster.

There are the ubiquitous Cesar and the tortured animals of Trubbi-ani, and among the assemblagists, Trafeli is as surprising and cunning This year's show, the fourth in Pietrasanta, is the most lively and comprehensive yet and will be enjoyable to even those not ordinarily young U.S. artists. Martell and

"Waiting Room," in bronze by William McElcheran (1978).

Nizette Brennan, combine unrelat-back oddly and delicately by ed materials with wisdom. It is Schiowitz of the United States and hard to say whether a piece by Miranda D'Amico is intended as an abstraction or is supposed to be the tongue-in-cheek replica of a package in bronze.

Figurative Section

In the figurative section, Aileen Curry Cloonan of the United States is a born sculptor, modeling enig-matic Giacometti-thin bodies so deftly and naturally that one is eager for her future work. There are dainty huddles of businessmen in dainty huddles of businessmen in gant shape by Hanna Eshel of terra-cotta by the Canadian Wil-liam McElcheran, a head curved pieces by Bernacchi and Vanelli of

a huge stone by the Yugoslav Ruzie with an odd. Janus-like cluster of archaic faces. The South Americans are as always close to their ancient gods. Roca Rey of Peru shows a magic bronze object, ritual flower insect or deity, and Tentindo and Silva of Argentina bave ob-scure but powerful idols.

In the abstract section are an Arnaldo Pomodoro and a Signori, a marble honed down to basic ele

Carrara, clusters of vivacious forms by Bigi of Pietrasanta, and a huge free-form marble piece by Sugawara of Japan to commemo-rate Dimitrienko, who died in 1973.

In all, there are more than 60 exhibitors, as well as sections oo the techniques of bronze casting, mosaics and handicrafts related to sculpture. The old workshops, filled with casts for Victorian statuary, offer diverting side trips.

Sculptors and Artisans in a Historical Center, Pietrasanta, Italy.

Theater in London

Edward Bond Tackles the Trojan War

By John Walker

ONDON — Edward Bond, al-ways ready and able to tackle the largest themes, rewrites Greek myth and the history of the Trojan war in his new play "The Woman," in repertory at the National's Olivier Theater.

The result is a work of epic gran-deur, often chilling — "How can we change the world with tender-ness?" he asks in a poem that resulted from writing the play, but ending more weefully than many of his plays. In each succeeding play, Bond travels further back in history to confront the violence and injustice of today's society, as if searching for the roots of irrationality, or perhaps he needs to distance himself from the modern realities of his first play, "Saved."

In Bond's siege of Troy, the Greeks are led by Heros, who, as his name suggests, is a heroic demi-god, a near-dictator deified by his countrymen. The war is not fought over Helen but over a stone statue of the Goddess of Good Fortune that was stolen by Troy's King Pri-am. Priam dies of old age as the play opens and Troy is ruled briefly by his widow Hecuba before she is ousted by her son and the high

Revolt of Poor

Troy falls not to Greek tricks, although they show themselves will-ing to lie to gain their objectives, but to a revolt of the city's poor,

Starving and dying of plague.

The first part of the play deals with the sack of Troy and, in particular, the fate of Heros wife Isene who, like the Ismene of myth. is buried alive as the result of an impulsive gesture of self-sacrifice. for Ismene offers herself as hostage to Hecuba in an attempt to make

the Greeks keep their word. It is Heros who orders her to be ricked up in the walls of Troy as he burns the city and orders the murder of Hecuba's young grand-son, Hecuba stabs out her eve in horror. And, in Bond's boldest stroke of rewriting, compressing 600 years of history. Heros returns to Greece to create the glory that was Athens, the city of the Parthenon and the cradic of democracy, which, as an escaped mioer makes clear in a searing speech, was built

on slave labor, In the play's second half Hecuba and the now simple Ismene — dug out by greedy soldiers who knew that she had been sent to her death wearing all her jewels — have taken refuge on a small island. And here comes Heros again, still searching for the statue of good fortune, and sull willing to slaughter in the name of honor and patriousm. "You want to be an innocent murderer," fsmene says to bim.

Race to Death

Hecuba persuades Heros into a race with a cripple in which the loser is to die, and then tricks Heros into losing. With his death, the Greeks depart, leaving the two damaged people — Ismene and the cripple — alive and living together, which is as happy an end as Bond has given us. has given us.

In the course of the play, Bond not only reshuffles the elements of Greek myth to expose a spurious heroism but also attacks the very notion of heroes - men who delib erately suppress the feminine side of their characters, who can build a new city with slave labor and think that they have thus created a new and better world.

Bond directs the play himself with great clarity, ecocentratiog the action in the center of the Olivier's open stage. An epie play requires epie aeting, depending upon quality of voice rather than depth of characterization, elemental rather than personal. And it gets appropriate performances, particularly from Yvonne Bryceland's Hecuba. Susan Fleetwood's Ismene and Nicky Henson's Heros, while An-drew Cruickshank, who is given the opportunity to create an individual, makes of Nestor a horrendous portrait of honey-voiced, time-serving conservatism.

After the passion and fury of Bond, Tennessee Williams' characters in "Vieux Carre" at the Piccadilly Theatre, a revised version of the play seen on Broadway last year, seem even more decadent usual, willfully weak and

son, the characters are familiar. since they, or variations of them, have appeared in most of Williams'

Death and sex are the motifs of the play. There are a dving consumptive painter and a dying genteel woman, both of them with a liking for rough trade. There are also two genteel older ladies, dying of malnutrition, and a landlady well on the way to madness who alternates between cooking food for her nonpaying tenants and pouring boiling water through the ceiling of her paying ones.

With Voytek's set, turning squalor into seedy glamor, the director, Keith Hack, has opted for an operatic style, perhaps in order to accommodate Sylvia Miles' effectively melodramatic performance as the landlady. Thus, when the writer has hallucinations of his grandmother, Hack actually shows her, illuminated from behind, nodding away.

Williams' attitude toward his characters is one that he defines in the play as godlike, that is, beyond morality. The most attractive quali-ty of the play is his generosity, his refusal to make ethical judgmeots. But there is also in the writing, as there was in his autohiography, a distressing archness of style, a shying away from the truth of a situa-tion, so that, although there are many moments of deliberate comedy. There is also much unintentional humor, where his words fail him.

At the Regent Theater, "The Great American Backstage Musi-cal" is fun, a pleasant parody of 1940s Hollywood musicals, with a witty book by Bill Solly and Donald Ward and wittier music and lyries from Solly. Its east of six are lively and inventive, projecting a delightful enthusiasm for the innocence of vesterday.

2d Royal Tomb Found in Greece

The Art Market

The Three Weaknesses of the System at Paris Auction Houses The legislator's concern was to

By Souren Melikian

PARIS (IHT) — As the English auction firms publish their end-of-season figures, sending them out to professionals and buying advertising space, one wonders what is happening in France, the other country with a claim to being an

international auction center.

The answer is simple: officially, nothing at all. Paris auctioneers do not release end-of-season figures. There are 70 of them, and the Chamber of Auctioneers, their professional body, or its five-member hureau cannot be bothered to mimeograph one or two pages and dispatch them. I inquired from one hureau member, who did not know the figure, why they do not publish it. I was told with a snigger that "there is a figure that can be looked up at the Secretariat de l'Hotel Drouot."

monsieur, on July 30th, of course, you won't find anybody."

On the other side of the Channel there is always someone to ask, and that about sums up the crucial difference between London and Paris. In London, a constant effort is made to release information to the publie. The information does have to be sifted, even scrutinized, like any information from a commercial source, for at times it reads a bit too much like victory bulletins con-secrating Stalin's five-year plans. Yet it is usually accurate, if not always complete, and it is available.

Ambiguous Profession

France has nothing. No yearly proceeds. No breakdown according to category. The main reason behind this silence, apart from the na-tional tradition of secrecy, lies in the ambiguity of the auctioneering profession. All French auctioneers are sworn officers of the law appointed by the minister of justice at the suggestion of the Chamber of Auctioneers. Their constitution was largely laid down under Napoleon I to organize a profession with the main task of holding judiciary auctions, in which the personal belongings of a failed debtor were sold to cover as many of his debts as possi-

Alternatively, these could be sales ordered by tribunals to settle a dispute between heirs, or even sales agreed upon by the heirs to divide an estate. Whatever the case, these were, by definition, mixed

protect the seller against forfeit, to make sure that whatever the outcome of the sale, the money would go where it belonged. Hence, the provision making the company re-sponsible for default by one of its members, and the extraordinary rule inherited from the 16th century, whereby half the auctioneers' fees are hanced over to a "common fund," the proceeds being divided equally among all 70 auctioneers at the end of the year.

'should happen to sell off paupers' property only, he would still get enough of a fee to make a living.

If an unfortunate auctioneer

In such a system, the emphasis is

are not allowed to boast of their achievements through advertising: their only legal form of advertising is the publication of the auction calendar. To insert notices inviting uled sales of a given category — as Sothehy's or Christie's do — is forbidden. And if an auctioneer succeeds too well in getting the attention of the media, he is apt to incur an official reprimand of the company, as was the case of a young auctioneer who brilliantly

The irony is that the original jus-tification for this system is virtually gone; judiciary sales account for less than 10 percent of the yearly proceeds, according to private sources. But the implications survive. This is why even today the predominant French auction is the sale of mixed goods: first, anything that can be hung on the walls — prints, drawings, paintings in that order; second, what is left lying around the room — glass, porce-lain, silver, bronzes, again more or less in that order; third, furniture; fourth, wall hangings and rugs,

London, on the contrary, all the sales organized by Sotheby's and Christie's, the two leading companies, are devoted to a given category — old masters, English silver, continental porcelain, and so forth.

tion. Worst of all is the atomization of the market. The total of avail-able goods for sale would easily allow Paris to have fine sales hy cate-

The consequences of the French system have virtually wrecked its chances in international competition. Worst of all is the atomical

The second major flaw in the system is its huilt-in encouragement to conservatism. When an auctioneer gory, but it is divided among 70 is assured to get his equal share of auctionecers. It is difficult even for the community's earnings, the leading groups to put together even if his turnover has been virtuits that negligible sales get in the

lic. national or international.

fifth, what hangs from the ceiling — chandeliers and other lighting fixtures.

This procedure is absurd; specialized sales are the exception. In case of the exception of the ex the money to buy his office - in accordance with prerevolutionary tradition, his appointment by the minister of justice comes only after being co-opted hy his colleagues, an election precooditioned by his ability to speed from \$50,000 to \$500,000 for the tenure — he is naturally determined not to lose his investment. Therefore, any change threatening the current privilege du missaire-priseur sounds horrifying. In such an environment, compeution does oot disappear but be-

can be viewed only one day before the auction takes place because the Hotel Drouot is full every day with the junk of judiciary sales. The peak of absurdity was reached this year when a sale of a collection of hronzes from the Iranian province of Luristan, with a special catalogue, could be viewed on June 20 only between 9 and 11 p.m. for a sale the following day. Those who had made the midafternoon trip from London — 1 was one of them
— in the middle of the Von Hirsch
sales to view this sale, and another sale held on the same day that included Iranian objects, did not have a chance to stay to see the Luristan hronzes. This category, no longer in great demand, needs all the publicity it can get; it did not get it and sold badly.

The play is an autohiographical one, of the education of a naive young writer living in a rundown rooming house in the French quarter of New Orleans. For that rea-

PARIS, SATURDAY-SUNDAY, AUGUST 19-20, 1978

U.S. Farm Exports Seen Setting a High

WASHINGTON, Aug. 18 (AP-DJ) — Exports of U.S. farm producis in the year ending Sept. 30 are expected to total a record \$26.6 billion, more than double the value of agricultural imports, the Agricul-ture Department said yesterday. That favorable balance for farm

trade also would be a record. Exports in the coming year should amount to about the same quantity with slightly higher average prices, the report said. The department's last estimate projected exports of \$1-to-\$2-billion more than last year's \$24 billion,

the previous high mark.
The new outlook said that the tonnage of major bulk commodines exported, such as wheat and cotton, is expected to be up about 15 percent by the end of next month from the last fiscal year. Because overall

prices will be down by about 6 percent, however, the value of the exports is increasing only 10 percent, the report said.

For the October-June period, it said, exports totaled an estimated \$20.5 billion.

and both higher prices and quanti-ties of meat, vegetables fruits, wines and malt liquors.

Dollar Weakness Linked To U.S. Inflation Outlook

NEW YORK, Aug. 18 (WP) — sence of some pretty harsh mea-leading Wall Street economists sures to deal with inflation. traced the dollar's latest bout of weakness in the currency markets to a simultaneous worsening in the U.S. inflation outlook and what they see as a deterioration in the government's resolve to do some-thing about it.

And while the Treasury Depart-ment and the Federal Reserve Board are, at the President's request, grappling with ways to stem the dollar's fall; the money market economists say that the only sure way to get a handle on the dollar crisis is to get a grip on inflation that will convince dollar holders abroad that they do not own a shrinking asset.

The policy difficulty is that the main measures suggested to fight inflation are politically unpalatable, such as a further run-up in in-terest rates that could throttle the economic expansion, or a drastic slash in the federal budget far beyond what the President or Congress have in mind, or some form of controls on wages and prices that would be abhorrent to both busi-

Exports were sluggish last fall, it noted, but during the spring were 21 percent greater than a year earlier because of new demand for wheat, feedgrains, soybeans and

soybean products.

Shipments of tobacco and animal fats are expected to be less than in 1976-77, it said.

Imports during those nine months reached \$10.6 billion, slightly higher than a year earlier, thanks to higher prices for cocoa

By Jack Egan

"As we read it, there have been in the last couple of weeks a signifi-cant loss of credibility in the anti-inflanon posture of the government as a whole," commented Gary Wenglowski, chief economist for Goldman Sachs & Co., the invest-ment banking firm.

As signs of weakness in fighting

inflation, he cited a greater timidity of the Fed under Chairman G. Wil-liam Miller recently to raise interest rates as well as the administration's muzzling of Barry Bosworth, the head of the Council on Wage and Price Stability, to limit his criticisms of prospective wage settle-ments in what was perceived as an attempt to placate organized labor.

"The most effective thing that could be done right now would be for the Fed to show a greater willingness to push up interest rates," said Mr. Wenglowski. But since even the current high level of interest rates has failed to curtail either consumer or husiness borrowing very much, he predicted that the line the United States, running at Fed would finally have to push the more than 10 percent — compared rate on federal funds to the 9 to 10 with negative inflation in Japanese

Nippon Electric Gets Satellite Order Nippon Electric said it has received an order to export a total of 100 earth stations for satellite communications from Satellite Business Systems Co. of the United States. The earth station is a radio frequency terminal to be used for digital domestic satelite communications, NEC officials said. The company declined to give the value of the order, but said

shipment of the stanons will start in February 1980. Toyota Reports Drop in July Output

Toyota Motor, Japan's higgest automaker, said its total output in July totaled 252,893 units. off 2.6 percent from the same month last year. It said domestic sales came to 158,942, up 26.3 percent, and exports 122,890, off 4.8 percent. Toyota officials noted that Toyota car exports to the United States last month dropped 22.6 percent from the corresponding period last year to 41,862.

Nissan Adds to 280Z Series

Nissan Motor Co. announced a new model of its Datsun 280Z series for the Japanese domestic market and said it will hegin to market the car in the United States in September or October. The price of the new model in the U.S. market has not yet been determined. The company also said it would have to think seriously ahour huilding an assembly plant in the United States if the dollar stabilizes at between 180 and 190 yen.

Santa Fe Abandons North Sea Well Santa Fe International Corp. said it has abandoned as a dry hole a well in the North Sea about 3 kilometers north of the Thistle Field. The drilling rig has been moved to a location 4 kilometers north of the Thistle Field. Santa Fe holds a 16.3-percent in-terest in the Thistle Field and 22.5 percent in the block outside Thistle Field.

Summit Promise Difficult to Maintain

FINANCIAL NEWS AND NOTES

Growth Target Is Seen Eluding Japan

By Henry Scott-Stokes TOKYO, Aug. 18 (NYT) - Japan may not be able to keep a key promise it made at the economic summit conference in Bonn only of \$2.35 billion.

Japanese officials are now warning that economic growth in the quarter April through June was only 4 to 5 percent at an annual rate, a slow start to the year and probably insufficient to enable the economy to achieve the 7 percent target for the full fiscal year.

The main problem, the officials say, is that the rise in the yen, which has elimbed 23 percent since January, when the dollar was quoted at over 240 yen, has a deflationary impact on the economy.

To some extent the surge in the yen bas been belpful. It has cut back exports, which declined by as much as 8 percent in volume in July. But the decline is undercutting growth in the economy. It has gone further than officials had pre-dieted and it discourages husinesses from investing in new plants and equipment. Nor has the fall in export volume belped Japan's over-riding international problem, its

percent range, long-term bonds to wholesale prices - has enabled But the economists say that the dollar crisis will continue in the ab-

to remain competitive.

Asarco and New Jersey Zinc,

The Japanese current account on halance of payments was in surplus hy over \$2 hillion in July, not far short of the near-record June figure

last month — to maintain a national growth rate of 7 percent in fiscal 1978.

Lapanese officials are now warrs. \$14 hillion in fiscal 1978, now appears out of reach. In the first four months of the

fiscal year, the surplus on current account totaled more than \$6.87 billion and officials here quietly admit that the effort to reach the target has utterly collapsed. A failure to meet the growth tar-

get would be even more serious. While Premier Takeo Fukuda deliberately refrained at Bonn from advancing the \$6 billion figure for the current account surplus, he emphasized the pledge to achieve a 7 percent growth rate.

That pledge is viewed as a coroerstone of Japanese economic diplomacy at a time when this country is under beavy cricisism in the United States and Europe for continuing to run record trade surpluses despite the huge appreciation in the Japanese currency.But now the pledge seems virtually certain to fail, perhaps by a large marting to the fail of the fa

Retail Prices Increase in U.K. By 0.5% in July

LONDON, Aug. 18 (AP-DJ) -Britam's index of retail prices rose last month by 0.5 percent. On a year-to-year basis, the rise was 7.8 percent in July, accelerating from drop in the short term, but they doubt it will go as low as the \$240-an-ounce producer price and some 7.4 percent in June and reaching the highest level since April's 7.9 percent, the Department of Employment said today.

> The index increased 0.8 percent in June. The current increase marked its smallest one-month rise since December. It was the first acceleration of the index since June

The retail price index, unadjusted, in July stood at 198.1, up from 197.2 in June and 183.8 in July

1977. The July figures are in line with earlier predictions that the rate of inflation will remain around 8 per-cent for the rest of the year, with small fluctuations from month to month. The small acceleration in the year-to-year index was due to the fact that an exceptionally low monthly increase of 0.1 percent in July 1977 has now dropped out of the 12-month comparison

The government has proposed guidelines of 5 percent on wage increases, for the year started August I, in an attempt to keep the rate of inflation below 10 percent through 1979.

The rise in the index in July, the Department of Employment said, was due mainly to increases in the level of mortgage interest payments, rising car and some food prices, higher bus and rail fares and increased electricity charges.

Bonn Report Clears Lockheed on Bribes

BONN, Aug. 18 (AP-DJ) - A West German justice ministry com-mittee said today that an investigation did not produce any evidence Lockheed Corp. paid hribes to get price, regardless of grade, said they West German contracts.

The committee, which was estabstill selling all of their metal for one lished in November 1976, in the price. St. Joe Minerals and Nation- past has issued several interim reports absolving Lockheed,

duce extra measures to expand its economy by August or early Sep-tember, if growth here started to flag. The Government, under strong pressure from businesses to stimulate the Japanese economy, plans to ohlige with a supplementary budget whose outlines will be announced Sept. 2 and with such other demand-increasing steps as bousing loans, equivalent to more than \$10

billion in total stimulus.

These measures will take effect only with a time lag, which means that their ulnmate impact will not work through the economy much before the spring of next year, or the end of the present fiscal year. Failure to achieve the growth tar-get is important, especially because it is becoming apparent at a time when Japan is preparing for anoth-er round of negotiations with the United States in September. At the Washington meetings, Japan's

growth and payments goals will come under review. External Economic Affairs Minister Nobuhiko Ushiba and Agrictulure Minister Ichiro Nakagawa arate meetings to negotiate with the Common Market and the United States on reducing import barriers, mainly on highly sensitive agricul-

This is not a time when Japan wants to appear at a disadvantage as a country that reneges easily on its international promises, but officials here hint there is little they can do to change the situation in the short time remaining.

marketing agent.
Japan is the world's largest purchaser of the metal, normally accounting for up to half of world demand. About 70 percent of its purchases go into platinum jewelry, which the Japanese prefer to gold. According to one analyst, Japan will buy 36 of 83 metric tons of platinum expected to be purchased in the non-Communist world this year. Non-Japanese jewelers likely will buy 15 metric tons and non-

platinum's recent increase can be aurihuted to the yellow metal's surge through the psychological \$200 an ounce barrier, analysts say. Japanese auto makers another 15 metric tons, with the rest being divided among other users. The metal's price increase over the last year can be attributed largely to the shortage between expected supply and demand this ear. Speculative demand accounts

for the premium of about \$26 an ounce in the free-market price over the South African producers' price.

Free-market traders currently are nervous about prices, as are most producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers; 32.75 cents a pound for prime western zine, the basic grade quoted by producers. mobile emission-control devices. Japan bas been buving about 100,000 ounces a month this year. precious-metal and currency traders, due to the dollar's erratic per-formance in currency markets. But the mysteries of Moscow's plannum-sales policy also are a source of concern to traders and produc-

ers, analysts say. South African producers are said to he refraining from boosting their price closer to the free-market level because of these uncertainties.

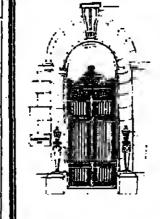

Some industry sources believe the Soviet Union already is step-ping up its deliveries to the West. A clear explanation never bas been given for the sudden cutback in Soviet supplies last year. Moscow indicated extra metal was needed at home to mint commemosecretary for international financial rative coins for the 1980 Olympics games, though coin needs are not thought to be enough to warrant as large a cutback as has been seen.

Some analysts suggest the Soviet Union has been having production problems at its mining complex in northern Siberia, but this has not been confirmed.

BOOKS

ARCHITECTURE AND YOU How to Experience and Enjoy Buildings

By William Wayne Caudill, William Merriweather Pena and Paul Kennon. Whitney Library of Design. Illustrated. 176 pp. \$16.50.

HOW TO SEE

Visual Adventures in a World God Never Made By George Nelson. Little, Brown. Illustrated. 233 pp. \$9.95. Reviewed by Paul Goldberger

WE ARE used to being told how to cook, how to improve our emotional state, and how to fix a leaky faucet, but not how to ments about the way things look comes naturally in a culture as full of visual images as ours, and that there is no more oced to train the eyes to see than there is to train the oose to smell. The truth, of course, is otherwise.

It is remarkable, in fact, how much there is in this country of what George Nelson appropriately calls "visual illiteracy." The aver-age adult has been brought up to have a passing knowledge of sports, food, movies, politics and finance, and at least to listen to music if oot to know much about it; but his level of sophistication often drops dramatically where visual things are concerned. What makes one building or chair or sign or toaster or entire city look better than another is a question that mystifies most people — if it occurs to them at all.

"How to See" and "Architecture and You" begin with the premise that most people do not look as carefully as they listen or taste or think, and they set out to remedy this situation. Both are primers very basic texts that, though intended for adults, take the reader rather gently by the hand and guide him carefully, in some cases too carefully, as both books have a cer-

tain tendency to condescend a bit.
The Nelson book is the better of the pair, in spite of the arrogance of its title and the tendency of the suthor, a designer of international stature, to offer up many of his own prejudices in the guise of objectivity.

Nelson tells us in his introduc-tion that he might better have called the book "How I See," and one can only agree, because with such a title it would be less irritating to be told, as we are here, that late-20th-century sculpture will have "no image of man," or that paioters today are more interested in painting things than people. He offers as proof an Andy Warbol soup can, which is a weak argu-ment indeed when one considers ment indeed when one considers that Warhol oow paints ooly portraits. And then there are other observations, such as Nelson's remark that banal corporate skys-crapers have taken over the skyline from the churches of an earlier era, a thought that, while true, seems to give the book something of a tooe of a lament for the decline of civili-

zation. But to the reader who is able to move ahead undaunted by all of these generalizations there is a great deal of sense here. Nelson talks eloquently about what is wrong with our attitudes toward design. On the subject of Lady Bird ritic for The New York Times.

Johnson's famous program to plant shrubs beside highways: "Such rec-ommendations were in the same class as going to Elizabeth Arden see. Somehow it is assumed that the for a cancer cure . . . one of the ability to make sophisticated judg- faults that came through clearly was that visual illiteracy, not billboards and dumps, was the central problem."

Best of all. Nelsoo understands that the visual environment is a complex tapestry of major and minor elements, and there is something appealing about any book oo design that has chapters on bread and skylines and spirals and streets and chairs and fire hydrants. Patterns are what Nelson sees best the similarity of the rings of a Jasper Johns target painting and a knot in a tree, for example, or of the circle of a glass dome and the view inside a jet engine.

It is in teaching us to look for such patterns — to learn to make the sort of analogies with our eyes that we are used to making with out iotellects - that the ability to see is truly developed. And it is in page after page of such analogies that this book becomes a valuable teaching tool.

If Nelson ranges far and wide to indicate the interrelatiooships among all phases of design, Wil-liam Caudili, William Pena and Paul Kennon deal only with archi-tecture, and while they speak a good deal of commoo sense, their

style is so simplistic as to severely compromise their book's value.

"Superb huildings have superb details," they tell us, and that comes not long after "great buildings make clear statements." Putting aside the relative truth of these ting aside the relative truth of these

I think they are both open to
questioo — are they really much
help in getting the layman to look
closely at architecture?

Oo the other hand, "Architecture and You" has a stroog point of view in favor of the basics - form, space, volume and light - and the authors make it clear that under-standing these elements of architecture is a lot more important than knowing whether a column is Ionic or Doric.

write it 500 times oo a blackboard. And the authors know, further, that architecture means nothing until you experience it, that being in space and looking at specially crafted forms are experiences that cannot be had second-hand.

If this book gets just a single reader to stop memorizing the dates of Gothic cathedrals and try

Garvey Hit Is Key

Dodgers Complete Sweep of Phillies

UPI) - Steve Garvey's basesoaded triple in the eighth inning snapped a 1-1 tie last night, lifting the Los Angeles Dodgers to a 5-2 triumph over Philadelphia and cut-ting the Phillies' first-place margin over Chicago to two games in the National League East.

The victory completed a three-game sweep for the Dodgers.

Los Angeles took advantage of a lapse in cootrol by Phillies' relief ace Tug McGraw (8-4) to break an eighth-inning tie. Dave Lopes walked and was sacrificed to second by Bill North Reggie Smith was inteotionally walked and McGraw walked Ron Cey to load the hases. Garvey then delivered his game-winning hit down the right-field line and scored on an errant relay throw from the outfield. Garvey also knocked in the Dodgers first run with a fourth-in-

Burt Hooton (13-2) scattered seven hits before being lifted for Terry Forster with two on and two out in he ninth. After a walk filled the bases. Forster fanned pinch-hitter Jerry Martin to record his 15th save. Ted Sizemore drove in both Philadelphia rons with a seventhinning double and an RBI single in

Giants 3, Expos 0

At Mootreal, Ed Halicki fired a four-hitter and Jack Clark hit his 20th home run to lead San Francisco to a 3-0 victory over Montreal. Halicki (6-6) picked up his fourth shutout of the year and seventh ooe and struck out four.

At New York, Dave Winfield knocked in three runs, Ozzie Smith collected three hits and scored three times and Gaylord Perry notched his 14th victory as San Di-ego defeated New York, 9-2. Perry (14-5) gave up five hits and two Grow limited Texas to four hits. runs in six innings before needing Kravec (9-11) struck our five but relief help from Mickey Lolich,

who recorded his first save.

At Pittsburgh, Don Robinson drove in two runs and pitched a four-hitter in leading Pittshurgh to a 5-1 triumph over Houston in the opener of a doubleheader. The Pirates also won the nightcap, 3-2, as

At Chicago, Rick Reuschel pitched a four-hitter and Dave Kingman hit his 20th home run of the season as Chicago beat Cincinnati, 2-0. Kingman's blast deep into the left-field hleachers, with one out in the second inning, came off loser Tom Seaver (11-12), who gave up six hits and ooe earned run in seven innings.

Cardinals 4, Braves 3

At St. Louis, George Hendrick was responsible for two runs with a sacrifice fly and a bases-loaded walk as St. Louis beat Atlanta, 4-3.

Tigers 9, Indians 5

At Detroit, Steve Kemp drove in six runs with a grand-slam homer and a double and Jack Morris turned in a strong relief effort to carry Detroit to a 9-5 victory over Clevelaod. The triumph was Detroit's 11th in 14 games. Cleveland lost its 12th in the last 14.

Red Sox 8, Angels 6

At Anaheim, reliever Ken Brett balked home Rick Burleson with the go-ahead run as Boston tallied twice without a hit in the sixth inning en route to an 8-6 triumph over California. Butch Hobsoo opened the sixth with a walk against loser Tom Griffin and was safe at second when Bohby Grich dropped Dave Chalk's throw on Burleson's grounder. After Jerry Remy sacrificed, Jim Rice walked. Jack Brohamer hit a grounder to first baseman Don Baylor, who stepped oo the bag before throwing late to the plate as Hobson scored complete game. He walked only the tying run: After Carlton Fisk walked to load the bases, Brett came on to balk home Burleson.

White Sox 4, Rangers 2

At Arlington, Ralph Garr had two doubles and a single and drove in a run and scored another, lead-ing Chicago to a 4-2 victory over Texas, Ken Kravec and Lerrin Lavielded to LaGrow with one out in the eighth after giving up his eighth

Brewers 6, Blue Jays 0

In Milwaukee, Don Money hit two RBI singles and set up a run with a double to back Bill Travers' five-hit pitching and lead Milwankee to a 6-0 victory over an error by Houston second base. Toronto. Robin Yount knocked in two runs with a double and single man Art Howe in the fourth inning two runs with a double and single led to two uncarned runs, doubled for Milwaukee, which swept the four-game series to extend their winning streak to five games.

Twiris 6, Royals 5

At Bloomington, Minn. Dan Ford's two-out single scored Bombo Rivera from second base in the 10th inning to give Minnesota a 6-5 victory over Kansas City. Rivera singled with one out off loser Larry Gura (10-3), and avanced to second on Rod Carew's single. Gura was then relieved by Al Hrabosky, who gave up Ford's game-winning hit.

Gottfried, Dibbs Advance in Net Meet in Toronto

TORONTO, Aug. 18 (UPI) -Brian Gottfried continued his winnmg ways in the Canadian Open tennis championship yesterday with a 6-2, 6-1 victory over Tom Okker of the Netherlands.

In his three matches so far, the second-seeded Gottlried of Bonaventure, Fla., has lost only 13 games while winning 36. He beat Ali Madani of Iran, 6-4, 6-2, and Canadian Greg Halder 6-3, 6-1 be-fore meeting Okker.

Gottfried's opponent in the quar-terfinals is Ivan Molina, who out-lasted Chile's Heinz Gildemeister

7-6, 4-6, 6-3 last night.
Top seed Eddie Dibbs of North Miami Beach, Fla., moved into the quarterfinals with a 6-3, 6-3 victory over Kjell Johansson of Sweden. He oext meets John McEnroe of Douglaston, N.Y., who overcame a slow start to beat Switzerland's Hans Gunthardt, 7-6, 7-0. Mexican Raul Ramirez subdued

Colin Dibley of Australia 6-2, 6-3, and moves into a quarterfinal match with New Zealander Chris Lewis. Lewis came from behind on a wiody side court to defeat defending champion Jeff Borowiak of Berkely, Calif., 2-6, 6-4, 6-3.

The fourth quarterfinal pits Argentina's Jose Luis Clerc, a 6-4, 6-0 winner, over Colin Dowdeswell of Switzerland, against Hungarian Balazs Taroczy, who downed Australiao Paul Kronk, 6-0, 6-1.

Play Set to Begin Next Year

Will U.S. Support Pro Rugby?

Membership in the English Rug-

by League and the international board will protect United States

For the start, about 240 players will be needed, of whom half will come from ahroad. The others are

expected to come from the ranks of

American football, especially players who could not keep a joh with a professional team. Size is not

mportant; a 150-pouod player is as

valuable as one of 250 pounds.

Sometime this fall there will be a

team owners from invaders.

By John S. Radosta

NEW YORK, Aug. 18 (NYT) — Can professional rugby, dear to the hearts of sports fans in much of the English-speaking world, succeed in the United States? A half-dozen entrepreneurs, partly financed hy venture money from the English Rugby League and fortified with recognition by that association and the Rugby International Board, have announced plans to introduce the 13-man sport to the United States in April, 1979.

Their main selling point is the American hunger for more of what the fans like in pro football -contact, speed, running, kicking, tack-ling, ball-handling and action that is more continuous. It already is familiar to many Americans because 15-man amateur rugby has been played in colleges and high schools for many years.

I believe rugby is probably the fastest, most physical, running, tackling and ball-handling game in the world," says one of the foun-ders, Jim Taylor, former star full-back of the Green Bay Packers of the National Foothall League and the commissioner of the specially created United States Rughy

"It is action all the way for 40minute halves, with breaks only for rule infringements and a halftime of, only five minutes," he said, This makes it very exciting to

Differences

Most Rugby League is profesby Union, which is entirely ama-teur. Its rules also differ to make the game faster and more fluid. There are 13 players to a side instead of the 15 in amateur rugby.

Rugby League is similar to foot-ball in many aspects. The object is to score "tries," equivalent to football's touchdowns. Tries are usually scored through deft lateral passes

that outmancuver the opposing team and get it out of position. Forward passing is prohihited, and so is blocking. The team that does not have possession of the hall may tackle only the player who is carrying the hall. The finesse of the game is that the ball carrier, with perfect timing, will pass laterally to a teammate just as he is about to be tackled. Tackling is much like a bear hug to prevent the carrier from throwing. Any player can

receive a pass.

The game is bruising played without helmets or pads, but there are fewer injuries than in football. The game is played on a field 110 yards long and 75 yards wide, longer and wider than an American football field. The ball is shaped like an American football but is

One reason Rugby League is faster than foothall is that there are almost oo delays. As soon as a tackle has been made, the ball carrier stands up, heels the ball backward to a teammate, and play resumes instantly.

Only two substitutions are allowed. If an injured player can-oot return to the match, his team carries on with 12 members.

12 Franchises

The United States Rugby League intends to sell 12 franchises at \$86,000 each, and there will be a 10-vear moratorium on expansion. An important goal is to keep costs low. League rules will prohibit competitive bidding for players, whose salaries are expected to average \$15,000. The league figures a team can operate for about \$1.2

Killanin Says No Accord Reached Yet With L.A.

ing the Games.

in the California city.

oancial responsibility.

Doo Miller, executive director of

million a year counting salaries, two-day tryout in Chicago for stadium rental, travel, uniforms, league dues and promotion.

Two-day tryout in Chicago for American candidates. British and French coaches plan to size them

up and send some of them to Euro-

days. In three or four years the pro-moters hope to develop enough tal-

ent to organize an American all-

star team to compete against teams

from England, Australia, New Zea-

the American teams.

LONDON, Aog. 18 (AP) — Lord Killanin, president of the International Olympic Committee, said today there has been no agreement to sponsible for running and financfree Los Angeles from financial responsibility if the city plays host to the 1984 Olympic Games.

He said reports from Los Angeles (IHT, Aug. 17) that the IOC has made a concession on this point are

"Negotiations are proceeding, and we are trying to see if there is a way of meeting Los Angeles in its difficulties," Lord Killanin said. But the rules of the Olympic Charter have to be observed. The tract. difficulties with Los Angeles involve Rule 4."

Cyclist Loses Medal After a

MUNICH, Aug. 18 (Reuters) -East German Army lieutenant Nor-bert Duerpisch was stripped tonight of the silver medal he woo in the amateur pursuit event at the world eveling championships here,

after a doping test.

Officials of the International
Cycling Union said he also has been suspended from competition for a month.

The 26-year-old defending cham-pion lost his medal less than 24 hours after being beaten in the pursuit final hy compatriot Detlef

Duerpisch was a member of East Germany's four-man "Silver Arrows" team, which set a world record for the 4,000-meter distance the deadline, this time to Aug. 29, of 4 minutes 17.97 seconds during a to coincide with the heginning of

Anton Tkac of Czechoslovakia

contract had been signed, Mayor Tom Bradley said he would recom-mend to the Los Angeles City Council that the application for the Games be withdrawn. The 1OC extended the deadline to Aug. 21 and persuaded Los An-

sign a contract hy July 31. When the deadline was reached, and oo

geles to go on talking. [Reuters reported from Lausanne that the IOC has again extended

an 10C executive board meeting in Lausanne that begins oo that date won the gold medal in the men's Presumably if oo contract is signed amateur spring event by beating before that date, the board will discuss an alternative site.)

Stones Loses a Bid to Have His Amateur Status Restored

LOS ANGELES, Aug. 18 (AP) — AAU and the International Ama-Dwight Stones has suffered his first teur Athletic Federation (IAAF) afsetback in a legal battle against the Amateur Athleuc Union, losing a hid for an injunction that would restore his amateur status.

Superior Court Judge George Dell refused yesterday to issue a European circuit this summer bepreliminary injunction that would force the AAU to reinstate the high jumper. Stones had asked that his amateur status be restored at least until his suit against the AAU is resolved.

Stooes, 24, was suspended by the

Jaeckel Shoots 65 to Take Lead In Westchester

HARRISON, N.Y., Aug. 18 (UPI) — Barry Jacckel fired a 6-under-par 65 yesterday to take a one-stroke lead at the end of the first round of the \$300,000 Westchester Golf Classic. Jaeckel, who earned his first vic-

tory four months ago in the Tallahassee Open, birdied the first two holes on the 6,603-yard Westchester course and went on to add six more against only two bogeys.
"I didn't even let the bogeys bother me." said Jaeckel, who had

11 one-putt greens. "I had so much confidence in my putter, I didn't care if I hit a bad shot. I knew my putter woold save me." In second place was Jim Albus, a

pro at a nearby course, with a 66.

Jack Nicklaus led a group of six two strokes behind Jaeckel at 67, while John Mahaffey, winner of the last two tournaments, including the PGA championship, was in a group of seven at 68. Fourteen players came in at 69 and 20 finished at 70. including TomWatson.

Andy Bean, the tour's leading money winner, came in at par71 along with 16 others. Defending champion Andy North had a 72.

cy Caulkins, the 15-year-old world record holder from Nashville, Tenn., to spearhead the attack on the East Germans' domination.

"Until 1973, every American national record was a women's world record. That hasn't been happening for a bit," said Coach Paul Bergen. who guided Caulkins to her world record 2:15.09 in the 200-meter itidividual medley at this mooth's AAU championships in Houston. Kim Linehan, another 15-year-

old, from Sarasota, Fla., posted a world mark in the 400-meter freestyle by clocking 4:07.66 at the ame AAU meet to add to her 1,500-meter world mark set in June. But that still left eight world re-cords to the East Germans with Barhara Krause and Andrea Pol-

lack grahbing a pair each ooly last

"It will take a world record to win here. There aren't just going to be two people on the blocks bat-tling it out. There may be five or six people who could win," said Ber-

Tracy has got it in her body. She is making faster times now than she was at the AAU. Now her mental attitude has got to be right."
Caulkins, however, working hard at training as the American team got its first feel of the Olympic pool yesterday, knows what is required.

"Sometimes you know you are tired but mentally you have got to block that out of your mind," said "I don't get oervous. I just go out and race. And I hope to stay at the

World record holder Steve Lunruist, from Jonesboro, Ga., already as his strategy worked out.

"I'm goiog to go to bed for three days," said the 17-year-old American who clocked his world mark 2:04.39 in a heat of the 200-meter

individual medley at the AAU. "I'm scared to death. I'll just be doing light workouts. Then I'm just out to do the best I can," added Lunquist, one of the youngest members of the powerful U.S. men's team.

Jesse Vassallo, Mission Viejo Calif., who posted his own world record with a 4:23.39 in the 400meter individual medley at the AAU, knows the dangers only too "There's a lot of people swimming between 4:25 and 4:29 who could drop to 4:23." said Vassallo.

aware that Russian Sergev Fesenko has a 4:25.20 uoder his belt. "There are eight people in the 200-meter individual who have clocked 2:05. And the Russian [Alexander] Sidorenko hroke the world record just a month before Steve did his."

Soviet Woman Sets Long-Jump Mark

MOSCOW, Aug. 18 (Reuters) — Vilma Bardauskene, of Soviet Lithuania, has broken the 7-meter barrier in the long jump, the Soviet agency Tass reported today. Tass said the 25-year-old Bardauskene, of Vilnius, set a world record of 7.07 meters with her first attempt in the a competition in Kishinev.

Soviet Moldavia. A world record of 6.99 meters was set by Sigrun Siegel of East Germany two years ago.

Art Buchwald

The Loved Ones

WASHINGTON — This is a care, law and order. You name it, government of reports and studies. No matter what happens in "How does a report find its final this nation, the first solution is to appoint a commission to study it. The commissions take one year, two years, some even longer, and then they make their report to the president. If the president agrees

with the report it is released to the nation. If he or his staff disagrees with it it is bur-

with it it is buried. But where?
Just by chance
I discovered the
secret burial
grounds of reports and studies made by presi-dential commis-

sions. The cemetery is located on a hill overlooking the upper Poto-mac. It is a quiet and deserted place, and only the chirping of birds or the call of a hoot owl can

Mr. Gottfried Snellenbach has been caretaker of the burial area for government reports ever since the Harding administration, and af-ter 1 had assured him 1 would not dig up any of the graves he let me enter the large, well-kept grounds.

"We've got some of the great re-ports of all times buried here," Mr. Snellenbach told me. "We've got reports that costs \$20 million, and reports that costs \$20 million, and This cemetery goes for miles we've got reports that costs \$2,000, and miles," I said. but in the end they all wind np here, buried six feet under." "Sir, what kind of reports are

resting here?" "It might be better to ask what kind of reports aren't buried here. We have reports on violence, the Communist threat, housing, health

Korchnoi Gets Delay

In Game Resumption BAGUIO. Philippines, Aug. 18 (UPI) — Resumption of the ad-journed 13th game of the world chess championship was postponed today at the request of challenger Viktor Korchnoi, Experts say Mr. Korchnoi has an advantage in posi-

Match officials said that the 14th game between Mr. Korchnoi and world titlist Anatoly Karpov will begin as scheduled tomorrow. The 13th game will be resumed on Sunday. The \$550,000 match is tied at "How does a report find its final

resting spot in this setting?"
"Well, as you know, the president is always appointing n com-mission to study something or other, and after the study they're supposed to hand in a report. Now, lots of nimes the president has no intention of paying any attention to the report and it's dead before it's even written. Other times someone on the president's staff reads a report handed in by a commission and says, 'This stuff is dynamite. We have to kill it.'

"In some cases the president says, 'Let's release this report to the press and then bury it.' Occasionally a report will just die of beart-break because nobody pays any at-

"In any case, after the report is dead it has to be buried, because if you're president you don't want someone finding it at a later date and using it against you.

"So every week each report that bas died is placed in a pine box and loaded on a government bearse and brought up here, where we have a simple ceremony before lowering it

into the ground.
"If it's a blue-ribbon panel report that's been killed in action, we give it a 21-gun salute. Otherwise, we lay it to rest with as little fuss as

"No one knows how many reports have been buried here by the different presidents." Mr. Snellenbach, this is a beau-

tiful cemetery and very impressive. But wby does the government go to so much trouble and expense to keep it up for nothing more than

paper reports?" You must understand that most of the men asked to serve on presidential commissions are very im-portant citizens. They spend months and years working on these reports, and they feel very close to them. When their reports are killed or buried, these men feel a personal loss. Many days you will see them sitting bere next to the tombstones of their studies, tears rolling down their cheeks. No matter bow long you work here, it still gets to you."

Art Buchwald is on assignment for a few weeks trying to find out if there are any Cuban troops on Cape Cod. He left behind his favorite columns.

Humans are better at strategy — planning, evaluating subtle differences in position, and thinking about long-term effects of certain formations. Programs are better at tactics — calculating effects of checks, threats, captures and sacrifices.

'Humanity' vs. Computer in Chess Match

By Lloyd Timberlake

ONDON (Reuters) — It is only a chess match, but it could represent a turning point for the buman race.

Later this month in Toronto, British international chess mas-ter David Levy will play chess against a computer program. It is n best-of-six-games match that represents the climax of a 10-

year wager. In August, 1968, Levy, then Scottish champion, bet two ex-perts on artificial intelligence £500 that no computer program could beat him before the end of August, 1978.

Side Bets

Various side bets have raised the total at stake to £1,250, as Levy played programs during the decade and beat all comers. But Toronto will be the big-gest challenge. Levy will dress in a dinner jacket and sit in a glass booth with television cameras trained on him as he battles a computer program called "Chess 4.6" developed at Northwestern

University near Chicago. Chess 4.6 is the champion ehess-playing computer program. It has beaten a number of international masters and two grand masters.

The Northwestern program is now stronger than 99.5 percent of the world's chess players," Levy wrote recently in the journal New Scientist. "I am still confident, but it is not in-conceivable I could lose,"

"Man versus machine" has

been a constant theme of folklore, myth and science fiction, and Levy said that some of the unaccustomed nervousness he

unaccustomed nervousness he felt was brought on because he is representing humanity.

"Once we get to the stage these damned things [computers] beat ebess masters there's no stopping them. Enormous computers and outshirk us in any any are the stage of the stage that the stage puters could outthink us in any task named," he said during an

Working on Robot

Levy will not be playing against a computer, but against a computer program, in this case one written by David Slate and Larry Atkin at Northwestern. Atkin is even working on a robot that will move the pieces and punch the time clock.

Their program, which they will probably upgrade to "Chess 5" for the occasion, will be run on the Control Data Corp. Cyber 176, the fastest computer

available commercially.

This speed, which allows
Chess 4.6 to examine millions of
possible moves, underlines the
difference between computer chess and buman chess, as Levy explained in New Scientist.

Humans are better at strategy - planning evaluating subtle differences in position and thinking about long-term effects of certain formations. Programs are better at tactics - calculating effects of checks, threats. captures and sacrifices.

Thus Levy has found that be must play computers differently than he would burnan beings. For instance, a bizarre early move will "confuse" the program, taking it out of the book of opening moves that has been He noted in New Scientist

programmed into it. Lowered Defenses Defenses can be lowered temporarily because the program is

poor at planning and coordinat-ing an attack But Levy also avoids "tactics." keeping the pace slow and making the program take the initiative.

"Thus the strategy I adopt is to do nothing. But I do it very carefully. Sooner or later the computer will dig its own grave." Levy wrote.

He said that he was training

for the Aug. 26 opening game by not playing any bumans for a month before it. To win his bet, Levy does not have to beat the program — he must avoid losing to it. Thus if all games are drawn or if Levy loses three and wins three he still

could be over in fewer than six games if either wins decisively. A Question

wins the money. The contest

Levy will be playing a two-game match at about the same time against a Massachusetts Institute of Technology program. but that program has not been involved in serious international competition recently, and Levy

expects little trouble from it. Levy remains fascinated by the question of whether computer programs are intelligent be-cause they are good at chess.

that a good test might be if a chess master, playing an oppo-nent invisible to him, could not tell whether his opponent were man or machine. If that opponent were a machine, that chine might be said to be intelli-

"I have never been faced with this situation, but I doubt whether I or any other chess master, could correctly identify an opponent that was a strong computer program," he wrote.

He noted that there are those who argue that in another 10 years computers will be tens or hundreds of times faster, and programs may be able to play like strong grand masters or maybe even world champions.

"Perhaps they are right." be

But wby go to the time and expense of devising chess programs at all?

Levy, himself a professional computer programmer for five years, argues that they could help man write programs for other intellectually difficult long-range planning tasks, like economic forecasting. Artificial intelligence could then move to other spheres.

"My only qualm is that perhaps it is wrong to regard the prospect with awe. Maybe fear would be more appropriate," he

PEOPLE: Creatures Sighted In Chesapeake Bay

Several persons have reported sighting strange creatures in Chesapeake Bay and a bit upstream in the Potomac River. The descriptions match, if not in size, at least in account appearance of these of tions match, if not in size, at least in general appearance, those of Nessie, the fabled monster of Scotland's Loch Ness. Donald Kyker, a retired CIA employee, reported that he and his wife Ann saw a creature about 25- to 30-feet-long and about as a telephone. and about as round as a telephone pole. He said it stuck its head out of water and then dived. "It wasn't a scary-type thing," said Mrs. Kyker, "I'm sure I saw it." John Merriner, head of the ichthyology department at the Virginia Institute of Morne Science said that the of Marine Science, said that the creature described by kyker is "one hell of an animal to be in the bay." Merriner said that the insti-rute will question Kyker. "The trail is cold now," be said, "but we will try to track it anyway." Kyker was the first person to report what he

Oakland, Calif., police are working on a case of parrot-napping. They have disclosed that Susan Saumders, a waitress, gave Orchid Saunders, a waitress, gave Orchid to William Stonestreet, of Moraga, Calif., for training, but both disappeared. Police bave issued a war-rant for Stonestreet. Miss Saunders said that Orchid is a cockatoo worth \$650. Sbe said that Stonestreet heard ber discussing the problems she was having in training her pet, told her that he had expertise in handling parrots so, if she en-trusted Orchid in his care, be would train him. "He's just a baby," Miss Saunders said of Orchid. "He doesn't know if he is coming or going."

There's a father-and-son lumberjack team in Ben Lomond. Calif., who keep rattlesnakes as pets and train them. Les Liebenberg, 62, and his son, Steve, 28, said that they have 40 rattlers. They started collecting them six years ago. They even taught one, named Uncle Sam, to wear a harness and pull a tiny covered wagon. They're training others to pull a miniature sta-gecoach. The Liebenbergs said that their neighbors think they are erazy, but to father and son the snakes are "mild-mannered with definite personalities and won't bite unless threatened,"

Fred, the king of the wolf-whistlers, is dead, and his passing marks the end of an era at the downtown Woolworth's store in Sault Ste.

Marie, Mich. Fred, a black myn whose piercing wolf whistles can many woman customers to do quick double take, was found de quick double take, was found de in his cage hy store manager Fn Price. Price said that Fred h stood guard over the store lor, years and rarely failed to whistle the female clientele. He would man occasional "hello" or "pre boy," Price said, but his special was his wolf whistle. A young ocaticl is being groomed as Fresuccessor. The bird has picked some of Fred's whistling techniq during his brief tenure at the sing but Price said he has a long way go. The cockatiel hasn't be named yet, but Price said that will probably be called Fred II.

Spain's No. I female bullfight 18-year-old Maribel Attenzar, is covering satisfactorily from inum received when she was tassed in the air by a bull and landed on the the air by a but and amore on a head in a Barcelona bulling. De tors said that X-rays showed a Miss Atienzar did not suffer da age to neck vertebrae, as had be feared, but she did receive a m cussion.

Ouebeu Premier Rene Leves has filed for divorce from his his lawyer said in Montreal, Ap ney Claude Paquette confirmed report in a French-language may zine that Levesque listed pen nent breakdown as the reason seeking a divorce. The magan seeking a divorce. The magan said he had offered his wife mon ly alimony of \$2,000. Levesque s and his 57-year-old wife, long L'Heureux, were married in 198 They have three grown childen The premier has said that he a his wife have lived apart since [9] Paquette said that no date has be set for a court hearing a Levesque's petition, but he expend it would be sometime this fall.

There won't be many friends; relatives attending the wedding Jerry Hakala and Shirley Cross-Spokane, Wash., because "church" will be too small. it be an elevator. The couple said they chose the Washington Tr Financial Center elevator because it was where they met. The R Marilya Witherspoon of the Un Church will officiate at the ceres ny, and Washington Trust B vice president John Hilsen will a the bride away. Hakala, an eleva service technician, met his bridebe four years ago while she with the building's cleaning staff.
